This exciting conference in its second year is designed for health professionals and people involved in health care, wanting to find out and share how health information technologies are being actively used and integrated into healthcare service delivery and health system improvement in BC.

Regardless of whether or not you are an innovator, average user, novice or technophobe, this conference will appeal to you as we showcase the most practical and applicable eHealth technologies and innovations relevant to a busy BC health care provider today!

We will aspire to assist every participant to identify at least one eHealth tip/approach that they can immediately use in their own professional practice to enhance patient care in BC. Please join this rapidly growing community of colleagues to support each other with tools to navigate the changing technology-enabled healthcare landscape, and work together to shape the future of eHealth in BC.

This conference is developed by UBC eHealth Strategy Office & UBC Division of Continuing Professional Development.
**What's App Doc? Prescribing and Using Apps in 2015 and Beyond**

Eric Cadesky, MDCM, CCFP
Clinical Instructor, UBC; Medical Coordinator, Louis Brier Home and Hospital; Board of Directors, Doctors of British Columbia, District 3 Delegate

**Practice Improvement through eHealth**

---

**An Intimate Encounter with Telehealth**

**Facilitated by:** John Pawlovich

**ROOM E**

15:00-16:15
CONFERENCE LEARNING OBJECTIVES

1. Explore the latest exciting developments and ways health professionals, clinics, hospitals and health authorities are using information technologies to deliver innovative health services to patients in BC.

2. Share the latest apps and electronic tools to enhance their own practices and better support them in engaging their patients in pursuit of better health.

3. Identify the new generations of technologies relevant to BC healthcare which are about to transform health practices, and what the current generation of health professional trainees are learning and using.

4. Participate in the dialogue as to how to guide the current health system to judiciously adopt information technologies into health care service delivery in the different clinical contexts in B.C. that can directly affect their patients.

WORKSHOPS  Limited spaces available.

- Use of Simulation for Professional Practice Improvement
- Social Media for Health Professionals: 10:30 or 13:15
- Virtual Clinic of the 21st Century
- An Intimate Encounter with Telehealth

QUICK POLL!
What is/are your role(s) in the health system? (check all that apply):
- Health practitioner
- Health administrator
- Policy or governmental position
- Educator
- Researcher
- Student
- Other: ________________

If applicable, what is your health profession?
- Dentist
- Dietician
- Nurse – RN
- Nurse – LPN
- Occupational therapist
- Pharmacist
- Physician – GP/family practice
- Physician – Specialist (please note specialty)
- Physiotherapist
- Psychologist
- Social worker
- Other: ________________

What is your primary practice setting?
- Community
- Group practice or clinic
- Hospital
- Residential Care
- Other
- N/A

Which of the following best describes you in terms of your relationship with ICTs (information and communication technologies)?
- Innovator/Champion: I am consistently on the cutting edge of technology. I have either developed or worked on some form of technology innovation or project.
- Super User: I love technology. Computers and other ICTs are a major part of my work and leisure. I often help others with technology.
- Average user: Proficient. Computers are part of my life, and I function as well as most.
- Novices: I know enough to get my email and put a word document together. I often need help (eg., downloading software, logging in to different sites, etc.)
- Technophobe: I dislike and avoid using computers and other technologies.
