

Setting EMR Reminders

1. We recommend embedding a reminder in your EMR, as with other chronic diseases
2. At a minimum, test ALL patients 18 – 70 every 5 years and patients > 70 at least once
3. Consider patient specific reminders based on patient population or ongoing risk

Med Access EMR

The screenshot shows a patient chart in Med Access EMR. The patient's name is Patient Test, and the chart number is 14053. A red circle highlights an observation in the 'Observations' section that reads: "14053 - COPD - has not been billed in last year. HIV Test Not Done in Last 2 Years".

Wolf EMR

The screenshot shows a medical summary for Test, Zebra M in Wolf EMR. A blue arrow points from a "1 Rule" notification in the top navigation bar to a "Rule Matches" window. The window displays a table of rule matches for the patient.

Rule Text	Start	Action Taken	Priority	Role
HIV Test Not Done in Last 2 Years	08-Apr-2014		5
